Objective

I am a passionate front-end developer who turns ideas into interactive, user-friendly web experiences. With a strong eye for design and responsive development, I build clean, functional interfaces that work across all devices.I love solving real-world problems through modern tech, intuitive UX, and clean code. Whether solo or in a team, I bring creativity, adaptability, and a hunger to keep learning and improving.

Skills

Front-end: React.js, JavaScript, Tailwind CSS, Prebuilt UI

Back-end: Node.js, Express.js, MongoDB , RESTful APIs .

Tools & Others: Git & GitHub, Postman, Vercel,

Soft Skills: Learning mindset, time management, effective communication, team collaboration.

Projects

The Garden Glow– (Gardening Community Website)   **Live Link   Client Side   Server Side**
Technologies Used: React.js, MongoDB, Express.js, Node.js, Tailwind CSS, DaisyUI, Firebase Authentication
Developed a responsive and interactive platform connecting gardening enthusiasts to share tips, explore expert gardeners, and access trending gardening advice. Features user authentication, dynamic content   loading, and a clean, eco-friendly design focused on community engagement and sustainability.

SmartShelf– (Library Management System)   **Live Link   Client Side   Server Side**
Technologies Used: React.js, MongoDB, Express.js, Node.js, Tailwind CSS, DaisyUI, Firebase Authentication
Built a web application for managing books, borrowing, and returns. Implemented user authentication, protected routes, user-based access, and dynamic book filtering. Enabled real-time updates to book availability and personalized user dashboards.
